THE NELSON TECHNICAL CENTER

The Nelson Technical Center is focused on the three key elements of the packaging system - the pallet, the packaging, and the material handling environment.

The Nelson Technical Center understands how these three elements must work together in order to achieve the lowest total cost for packaging and the least amount of product damage.

Through this systems approach, The Nelson Technical Center provides companies with the tools that they need to design new packaging systems, improve current packaging systems, all while enhancing sustainability.

When the abilities of The Nelson Technical Center are combined with The Nelson Company's **product solutions and the reverse distribution systems of Nelson-ART**, companies across the globe will come to realize that this is one of the greatest total packaging system/unit load offerings ever made available!

WHAT WE DO

- Technical Support
- Design Improvement, Cost Reduction, and Enhanced Sustainability
- Lab Testing and Field Trials
- Packaging System Design for New Product Launches
- Turn Key Packaging System Programs

WHAT TO EXPECT

- Opportunity Analysis
- Economic and Sustainability Comparisons
- Testing and Field Trial Reports
- Technical Specifications and CAD Drawings
- Priority Access to the Product Offerings of The Nelson Company
- Free Reverse Distribution Analysis - powered by Nelson-ART
